Dr Allen's Device is designed to provide exclusive treatment for men with **benign prostatic hyperplasia** (BPH). The device improves blood circulation in a prostate gland, while applies a natural thermoelement tightly to the body in the projection of the prostate.

This thermoelement accumulates the emitted body heat and becomes a source of energy. This safe energy eliminates the continuous trigger that supports prostate growth. As a result, the prostate stops its enlargement and even reduces the enlarged prostate in size. The prevalence of BPH increases markedly with increasing age and affects 70% of men aged 60-69 years in the United States. As the world's population ages, the incidence and prevalence of

BPH play an important role in the quality of life of men, as it affects 80% of those 70 and older.

Thermobalancing therapy with Dr Allen's Device has been patented in the US as "Therapeutic device and method". The patent is an acknowledgment that it is indeed a completely new method that uses own body energy for chronic non-malignant diseases.

Standard treatments for BPH are drugs and various surgical interventions. These treatments have serious side effects that negatively affect the quality of life of millions of men worldwide.

Health problems related to standard BPH treatment

Long-term courses of risky drugs are widely used for BPH. The most popular of them are:

- Alpha blockers, which relax the muscle of the prostate and bladder neck that allows urine to flow more easily, Tamsulosin, terazosin, etc. These drugs can develop fatigue, headache, dizziness and sexual dysfunction.

- Hormonal drugs - 5 alpha reductase inhibitors: finasteride, Avodart responsible for irreversible side effects: impotence, depression, testicle pain, and even

diabetes.

It should be noted that BPH drugs are becoming ineffective gradually, but the side effects do not disappear.

Men are looking for a surgical procedure to remove the prostate gland or part of it. Surgical procedures, including minimal invasive, have many unpleasant and life-long complications, which can cause depression, almost in 25%.

Thermobalancing therapy (T-Therapy) treats a prostate gland

Urinary symptoms, such as frequent urination at night, a weak urine flow, or the feeling that you should urinate after you just went, or other similar signs often appear in men after 50. This is due to an enlarged prostate that presses the urethra and bladder. However, BPH is not a life-threatening condition, so it should be treated with caution.

T-Therapy for the first time uses the safest energy. In February 2019, Innovative Journal of Medical and Health Science published a new article: The cause of chronic prostatitis and prostate enlargement is a change in the vascular level and requires similar treatment: innovative Thermobalancing therapy, which explains that this unique

therapy treats entirely the prostate gland.

10-year empirical evidence and clinical research show that Dr. Allen's device effectively reduces prostate volume and, as a result, urinary symptoms in men with an enlarged prostate

The outcomes of clinical investigations on Thermobalancing therapy were published in leading peer-reviewed medical journals. The efficacy of T-therapy was discussed by medical professionals at the different health conferences worldwide: in Spain, China, Italy and other countries.

Fine Treatment delivers T-Therapy to everyone

Fine Treatment, <http://finetreatment.com>, manufactures and distributes Dr Allen's Device for Prostate Treatment worldwide via Royal Mail Tracking service within a week. The price of delivery is included in the total price of the device.

Unlike the cost of standard procedures, calculated in thousands of US dollars, the Dr Allen Device with a price of less than 200 US dollars is the most economical solution for BPH treatment.

Dr Allen's Device is a class 1 medical device, which does

not require the involvement of a notified body. As this treatment method is side effects free, every man can use it at home without worrying.

“Innovative Thermobalancing therapy can help millions of men with enlarged prostate gland to improve the quality of life and well-being throughout the world,” published in the World Scientific News, is one of various scientific articles that provides information about T-therapy with Dr Allen’s Device, which uses the energy of its own male body to treat the affected prostate.
