

Fine Treatment Celebrates 10th Anniversary of Successful BPH, Kidney Stone and Back Pain Therapy

Fine Treatment is celebrating ten years of helping sufferers of chronic diseases with Dr Allen's Device, allowing them to overcome pain and effectively treat their conditions to enjoy life.

This at-home treatment is particularly important during a pandemic. It is confirmed in a new medical article published by Springer Nature, a leading scientific publisher, titled "Innovative Thermobalancing therapy and Dr Allen's device for the first time employ body energy to treat chronic prostatic disease effectively" in International Journal of Quality Innovation. It shows the benefits of this novel treatment and that it can significantly reduce the need for other medical interventions: <https://rdcu.be/b4Ly3>.

Fine Treatment was founded by Dr Simon Allen and Ariana Adjani, the inventors of Thermobalancing therapy and Dr Allen's Devices. In April 2010, Dr Allen's Device received MHRA approval in the UK. Since then the growth of the non-invasive 'wearable' device has been organic and expansive, reaching people in over 100 countries worldwide.

DR ALLEN'S DEVICE

Unique and Exclusive Treatment for

- **Enlarged prostate**
or benign prostatic hyperplasia (BPH)
- **Inflamed prostate**
or chronic prostatitis, pelvic pain (CP/CPSP)

Common prostate problems affect 25% of men
Enlarged prostate and chronic prostatitis are nasty, causing much discomfort, pain and sexual dysfunctions. The standard treatments are risky with side effects and complications.

The patented **Dr Allen's Device** has a clinically proven efficacy. It improves blood circulation in the prostate. It targets the cause of BPH and pelvic pain non-invasively.

Dr Allen's Device is a soft belt with a specially designed thermoelement. It's easy to wear, and has no side effects.

Thermobalancing therapy provided by the device treats a range of conditions, including kidney stone disease, benign prostatic hyperplasia (BPH), chronic prostatitis, also known as chronic pelvic pain syndrome (CP/CPSP), coronary heart disease, and low back pain.

The therapy works by encouraging blood circulation in affected organs through temperature regulation. Capillaries are identical in every part of the body – so by optimising their functioning, Dr Allen's Devices treat various chronic diseases in the

same way. This treatment achieves pain relief and stimulates regenerative processes in the affected organs.

Various health conditions for which Dr Allen's Device is used

Conditions such as BPH and chronic prostatitis affect a significant number of people: nearly 1 in 4 men will suffer from benign prostatic hyperplasia (BPH) over their lifetime, while chronic prostatitis symptoms trouble around 10% of men. BPH occurs in 50% of men between 51 and 60 years old and 90% of men over the age of 80. Prostatitis indiscriminately affects men at any age, young and old. Dr Allen's Device, which provides effective, safe, and non-invasive treatment, is therefore meeting demand for extremely prevalent conditions.

Although chronic pelvic pain, renal colic, sciatica and back pain are nasty symptoms, they all relate to non-life-threatening conditions, which ought to be treated safely and non-invasively in the first place. Using Dr Allen's Device is not only a preferable option for health outcomes, but also a financially sensible alternative, costing around ten times less than the annual cost of BPH drugs, and up to fifty times less than surgical interventions, whilst also simplifying the delivery of treatment.

Thermobalancing therapy, through wearable Dr Allen's Device, provides a safe non-invasive treatment, with effective pain relief. Conventional treatments for these chronic illnesses, which consist of strong medications and aggressive surgeries, generally have low effectiveness and also frequently have unpleasant complications.

The significant benefits of Dr Allen's Device upon chronic ailments have been recognized by two clinical trials registered with the World Health Organization, over fifteen publications in scientific journals, and ten years of empirical observations. This Thermobalancing therapy has been proven to be an effective first-line treatment in improving chronic conditions, easing pain, and increasing quality of life of patients. These benefits have been backed up by multiple testimonials from satisfied customers.

For the treatment of kidney stones, Dr Allen's Device has been proven to help dissolve stones, ease pain, and reduce recurrent episodes of renal colic. There is also substantial evidence that Thermobalancing therapy can improve kidney function in people with chronic kidney disease (CKD).

Back pain relief is also achieved through consistent application of Dr Allen's Device to the body over the sore area. The pain relief effect strengthens over time, and in simple cases of sciatica, a week of use is enough to significantly reduce discomfort.

Thermobalancing treatment is safe and easy to use

Dr Allen's Device consists of a small thermoelement, which fits inside a protective pouch, and then inserted into a supporting garment - a belt or a T-shirt - and positioned over the affected area. The thermoelement is made of a special wax-based material, optimized for heat accumulation, maintenance and transmission. When worn, it accumulates the naturally emitted body heat, and becomes a source of energy itself, constantly maintaining the temperature locally at the required level.

Fine Treatment continues to look to the future, forging a constructive approach to healthcare sustainability. Dr Allen's Device uses body heat for charging, and is energy efficient, minimising both waste and CO2 emissions. The use of Dr Allen's Device has a positive impact on climate change.

Fine Treatment <https://finetreatment.com/> is an innovative British healthcare R&D and medical devices company, a manufacturer and distributor of wearable therapeutic Dr

Allen's Devices. Fine Treatment is registered with the UK Department for International Trade (DIT). The great value price of Dr Allen's Device includes free guaranteed delivery by Royal Mail tracking services worldwide.

Solutions such as Dr Allen's Device are particularly useful during the coronavirus (COVID-19) pandemic. It is of vital importance that people maintain social distancing, and the choice of this innovative Thermobalancing therapy means that chronic diseases may be treated from the comfort of home. This removes the need to visit hospitals and protects users and health care professionals from the unnecessary risk of contracting the virus. Fine Treatment is working hard to help people improve their health and wellbeing safely.
